

Bolle Warrant Interchangeable Lens Sunglasses

Frame: Titanium

Lenses: Two Lenses, Competivision Gun + **Polarized** TNS Lens

Bolle Warrant Interchangeable Lens Sun Glasses come from the Bolle Sunglasses Performance collection. The Bolle Warrant Sunglasses w/ Interchangeable Lenses were designed around dual Bolle Toric lenses, which provide distortion-free comfort. This unique lens closely conforms to the contour of the face while maximizing peripheral vision and protection, providing comfort and protection from UV rays, dust and wind. The lenses themselves have two different base curves — one vertical and one horizontal — that follow the curve of the eye. This allows for maximum curve, contour and coverage, while the optical center of each lens is aligned with the visual center of the eye. This alignment ensures that visual distortion is minimized when looking straight ahead or looking out at an extreme peripheral angle. Unlike standard sunglasses, the Bolle Warrant Interchangeable Lens Sunglasses ' Toric lenses were designed to eliminate peripheral refraction — the cause of blur. These lenses provide the wearer the ultimate comfort and vision without the distortion that can cause headaches, nausea, loss of balance and dizziness.

The polycarbonate lenses are made from lightweight, premium-grade resin that's 20 times more impact resistant than glass and one-third the weight. And the Optics Control System (O.C.S.) interchangeable lens system lets you choose the right lens for your sport.
